Thank you all for your excellent effort on this. Last night, DEP's senior management decided to not pursue this option. They expressed appreciation for our willingness to assist. Thanks again, Dore.

Walter and Dore,

We have indicated to NJDEP since the beginning of this discussion that we would be willing to support air monitoring or sampling on this site if they request our support through FEMA. We do have an existing MA that would cover this work. The State just needs to make the request. Once again they have been reluctant to do so because of the cost share issue. This issue is Sandy related so the State submitting a request to FEMA for the work would be appropriate. We would use our Direct Federal Assistance MA for NJ. FEMA could extend the dates of that existing MA and provide the additional funding (we would submit the cost estimate) to cover the project. NJ DEP BER had requested that we do this work under Superfund which we would not normally do in this instance and we have pushed back on this request.

We are ready to go immediately on this mission if the State requests our assistance through FEMA.

Regards,

Eric

Dore,

Assuming there is indeed a Hurricane Sandy link, we would have to see whether we have an existing FEMA Mission Assignment to cover it. Do we know what the purported Sandy link is?

I'm including Eric Mosher and Chris Jimenez on the email list.

- Walter

All, Wolf called me and requested perimeter H2S sampling under Sandy. They are doing hand-held monitoring and getting high readings. We are contacting ERRD to see if this is still possible.

I have calls in to Eric Mosher, Carl Pellegrino, and Cris D'Onofrio. I've asked whether or not NJDEP can still open up a FEMA mission assignment for Sandy clean up efforts that can be used for sampling at the land fill, and whether ERRD can do the sampling for DEP. I'll let you know as soon as I hear back from them.
